CHAPTER IX

THE AFTERMATH

A ST. HELENA PICTURE IN 1865

IT WAS SUNDAY in May, 1865. The sandy road, covered in the low places with a top dressing of oyster shells, led off among the cotton fields down the Island. On either side were sagging wire fences, reminders of plantation boundaries before the war, the wire sometimes propped by drooping posts, at other times deeply embedded in the trunks of fine trees forming magnificent avenues.

Here and there were small frame houses, with narrow porches and four or five rooms, the residences of former overseers. Rude pine-log cabins, newly built, and clapboarded shanties leaning crazily in the mid-day sun dotted the fields. Gardens of growing vegetables separated the cabins from the rows of cotton that extended away as far as one could see. Little stakes occasionally marked off private holdings, sometimes the only boundaries in fields of a hundred or more acres of cotton. Just beyond was a large tract lying fallow, covered with a luxurious growth of cassina and dewberries, or perhaps a young forest of pines had sprung up among cotton furrows which, though idle for many years, were yet plainly visible.

The cotton was small, for it was not more than four weeks out of the ground, but the corn was knee high. Neat ridges were already piled up about the cabins waiting until the young sweet potato slips were large enough for transplanting. Here the fields were beautifully clean, carefully hilled up with the hoe by the women and old

175 659 736 William Elliott, one of several natives who had returned to Beaufort to live, was appointed to look after the needy in Beaufort and on the islands. In this way, the Negroes were able to face "the starving times."

175 248 If the profits from the cultivation of sea-island cotton were low in ante-bellum days, they were far less during the uncertain days of reconstruction. While some Negro landowners worked their cotton well, fertilizing the land and hoeing the crops regularly, still others were careless and indifferent. As a rule the cotton grown after slavery was of a coarser quality than that produced by ante-bellum planters. The fine seed, the result of many years of selection, had deteriorated. In fact, much of it was lost when the crop of 1861 was ginned at the North. Nor did the Negroes take pains to manure their fields. Gathering marsh grass and mud were disagreeable tasks which most of them preferred to avoid. The Negro landowners were further handicapped by the fact that they had to sell their cotton in the seed to the island stores and could not hold it for higher prices. A correspondent for *Harper's Monthly*, S. G. W. Benjamin, who visited St. Helena Island in 1878, found most of the Negroes growing vegetables and only a small quantity of cotton. Nevertheless, cotton remained the Islanders' only money crop. When, therefore, the boll weevil destroyed the production of sea-island cotton in 1918, the Negro landowners of St. Helena were confronted with an economic readjustment as radical as their fathers had faced after slavery.

(244) (434)

175 511 735 After the inflation of war times, the Negroes of St. Helena quite generally settled down to an economic regime of self-sufficiency. They raised sweet potatoes and
